

## + employment

### Point Inside Inc.

Data Content Technician  
2016 to 2017

Bellevue

I designed and updated new and existing maps with the most recent store data provided by retailers such as Lowes and Target, and also shopping malls and airports. My role included drawing maps using Adobe Illustrator, SVG elements to XML conversion using a proprietary software. And finally, reviewing the XML before being loaded onto mobile apps.

### General Assembly

Student  
2015 to 2016

Seattle

I was a full-time on-site bootcamp student in Seattle. By the end of this course, we become a full-stack web developer with exposure to building functional and professional web apps from the ground up. For Node.js based apps, we learned Express server, Sequelize ORM, Postgresql, test-driven development with Mocha and Chai, OAuth for user authentication and Strategies; For Ruby on Rails based apps, it includes training on test-driven development with Rspec, OAuth, Active Records ORM. Overall, we dove deep into the concepts of MVC, Bootstrap, Javascript, JQuery, AngularJS, ReactJS, Mongo, DOM manipulation, database design and manipulation and responsive web design.

### Banfield Pet Hospital

Veterinarian Assistant  
2013 to 2016

Bellevue

I was able to use my freedom of speech for someone who has no voice. Being able to explain what needs to be done to client's pets in order to find the problems and treat them, triage, making sure pets feel as comfortable as possible and keep the hospital running. I enjoyed running lab test and analysis, surgery assisting, anesthesia monitoring, taking radiographs, giving vaccination, blood draw, cleaning and wrapping up wounds, interacting with clients and pets and sharing my medical knowledge with clients.

### Online Marketplace

Entrepreneur  
2008 to 2013

California

I was the sole owner of an online marketplace which I designed using basic web technologies like HTML, CSS, JQuery and javascript. I designed and created all the products including one of a kind custom ordered stuffed animals(usually related to client's favorite sports team) and custom made baby-related products such as bibs, insulated bottle warmers, etc.

### DHL

Software Engineer  
2007 to 2008

After the industrial-level Java programming training in India, I was hired as a graduate trainee at DHL. My main responsibilities were writing technical documentations and developing prototypes based on Java's J2EE. I improved the system requirement documents by adding entity relationships diagram, flowcharts, test scenarios and program specifications. At the mean time, I introduced JDBC to my team and shared my knowledge on J2EE.

### Infosys

Software Engineer  
2007 to 2008

India

I was given this opportunity by Infosys(India) and Campus Connect Program. It included a full-time 4-month training that involved world-class instructors on Java(specifically J2EE) and Oracle. We were asked to build web applications using J2EE, HTML, CSS and javascript. Every assignment includes developing a web app from the ground up using JSP, AJAX, JDBC, Apache, etc.

### Vector International

Software Engineer  
2006 to 2007

Started as an intern, I built an employee time sheet system using PHP, mysql and Apache. Employees can better manage their time off and vacation requests. The admin can use this web application to look at employee's clock-in and clock-out time stamps (data comes from employee badge scans). The system has a complete technical document consisting of data flow diagram, flow chart, entity relationship diagram and system requirement specifications. After 2 months of internship, I was hired as a software engineer I, I was given the opportunity to work alongside some of the senior engineers. Together, we developed a touch screen system that integrates with Merten hardware. We call it Intelligent Home. I was the sole developer for its user interface design with VB.net.

## + summary

I am a computer science graduate with a couple of years of professional experience in Java and VB.net between 2006-2008. I am currently working on web development using javascript, JQuery, HTML/CSS, AngularJS, NodeJS, PostgreSQL and Ruby on Rails. I am looking for a suitable front-end developer position.

When I'm not coding, I enjoy the outdoors such as hiking with friends and walking my dog.

## + skills

### FRONT END

javascript  
CSS  
HTML  
JQuery  
Bootstrap  
AngularJS

### BACK END

Java  
Ruby on  
Rails  
NodeJS

### OTHERS

MongoDB  
Postgresql  
SQL  
Adobe  
Illustrator  
Adobe  
Photoshop  
AWS(Beginner)

## + projects

### Drinkmate

(Do you love cocktails? This is the place to go for recipes and videos!)

### Fox.vet

Instagram for veterinarians and nurses

### Jungle(board game)

Just a childhood game, like Stratego but animals instead of numbers. Could use some bug fixing

## + activities

Expedia Hackathon 2016

Google Hackathon 2016

Point Inside Hackathon(2017-winner)

IBM Watson Hackathon 2016(Online)

Member of Seattle's Sport Techie(Meetup Group)

Member of IBM Watson Developer Community(Slack Channel)

## + education

Multimedia University(5 years)  
Bachelor Computer Science 2006

PIMA Medical Institute(1 year)  
Certification Veterinarian Assistant 2013

Infosys(6 months)  
Certificate Java 2007

General Assembly(4 months)  
Immersive Web Development Bootcamp
